Summary

DevOps and Cloud Enthusiast with hands-on experience in AWS, CI/CD pipelines, Docker, and Terraform. Skilled in automating deployments, provisioning infrastructure as code, and managing Linux-based cloud environments. Strong foundation in Python, Git, and backend development with a focus on building scalable and reliable systems. Passionate about cloud-native technologies and continuous learning.

Education

- Marathwada Mitra Mandal's College of Engineering, Pune** 2027 (Pursuing)
B.E. – Information Technology — CGPA: 8.57
- Abhaysinhraje Bhonsle Institute of Technology, Shendre** 2024
Diploma in Information Technology — 91.88%

Skills Summary

- DevOps & Cloud: AWS (EC2, S3, IAM, VPC, CloudWatch), Jenkins, Docker, Terraform, Linux, CI/CD
- Programming & Scripting: Python, Shell Scripting (Basics), Java, C++
- Version Control: Git, GitHub (Branching, PRs, Collaboration)
- Backend & APIs: FastAPI, Flask, REST APIs
- Databases: MySQL, MongoDB, Oracle
- Frontend (Basic): React, Next.js, HTML, CSS, JavaScript
- Core Concepts: Operating Systems, Networking Basics, OOPs

Experience

- Eduskill Foundation – AWS Cloud Internship** Remote
AWS Cloud Intern
Jun 2025 – Jul 2025
 - Deployed and managed AWS EC2 instances in a Linux environment for hosting applications.
 - Configured IAM users, roles, and security groups to ensure secure access control.
 - Created and managed S3 buckets for storage and backup purposes.
 - Containerized applications using Docker and ran them on EC2 instances.
 - Monitored instance performance and logs using AWS CloudWatch.
 - Used Git and basic shell scripting to support deployment and version control workflows.
- Microdynamic Software Private Limited** India (On-site)
Android Developer Intern
Jun 2023 – Jul 2023
 - Developed and optimized Android applications using Java and Android SDK, improving responsiveness by 20%.
 - Collaborated with teams to design and test features, reducing bugs by 15%.
 - Debugged crash issues and improved UX, reducing load time by 30%.
 - Worked with Android Studio, Firebase, and Git.

Projects

- CI/CD Pipeline for Web Application** Designed and implemented an end-to-end CI/CD pipeline triggered on GitHub commits. Automated build, test, Docker image creation, and deployment to AWS EC2 using Jenkins. *Impact: Reduced manual deployment and ensured faster, reliable releases.* **Tech: Jenkins, GitHub, Docker, AWS EC2, Linux**
- AWS Cloud Deployment of Web Application** Deployed and managed a production-ready web application on AWS EC2. Configured security groups, SSH access, and application services on Linux instances. *Impact: Enabled secure and scalable cloud-based application hosting.* **Tech: AWS EC2, IAM, Linux**
- Infrastructure as Code (IaC) using Terraform** Provisioned AWS infrastructure using Terraform instead of manual console setup. Created reusable Terraform configurations for EC2 and security groups. *Impact: Improved consistency and repeatability of infrastructure deployments.* **Tech: Terraform, AWS**
- HackMates – Hackathon Discovery & Team Formation Platform** Platform to discover hackathons, form teams, and collaborate using AI-powered matching and real-time communication. *Impact: Improved team reliability through trust scores and synergy matching.* **Tech: React 18, TypeScript, Firebase, Tailwind CSS, Gemini AI**
- CareerAdvisor – AI Career & Skills Advisor** AI-driven career guidance platform providing skill-gap analysis and learning path recommendations. *Impact: Helped students make informed career decisions.* **Tech: PHP, MySQL, Vertex AI**

Achievements & Certifications

- Tutodude DevOps Course completion(2026)
- Hackathon Winner – Tutodude Web Hackathon (2025)
- Hackathon Winner – SkillsPrint 2025 by Skillecated
- Completed Hacktoberfest with 6/6 PRs merged
- GirlScript Summer of Code 2025 – Certificate of Appreciation
